

Exercises to the Lecture FSVT

**Exercise 18:**

Do the exercise on the consumer/producer-problem from slide 142.

**Exercise 19:**

1. Prove or disprove correctness of the abstract version of termination detection algorithm from slide 154.
2. Answer the question from slide 156, whether the given DASM on the termination detection problem is a refinement of the more abstract DASM. Take the problems resolved into consideration.
